Comments: To whomever this many concern,

Why is it after this long and knowing of all the impacts oil and gas have, we have to deal with this? No new leasing is going to make enough money to amount to the damage oil and gas would make. Making such destruction should put somebody in prison but no they get paid. Just wait a couple years until more renewable energy is available and you can get your moneys worth something to provide sustainable energy to the community and still be rich as you would or even more so if this land would be sold to oil and gas. Everybody has a responsibility to take care of this land my people have for thousands of years and its time everybody else does too or let us take care of it and have the last say before oil and gas companies kill us all.
