Comments: I object to this proposal. Wilderness area lands as well as other public owned lands should NEVER have any oil/gas/coal operations allowed on them !!! The Trump administration has already "opened" far too much public land for these sorts of operations and this proposal is just another attempt to add to his flawed agenda. The highly probable negative environmental impacts (air, water, wildlife, additional roads within a wilderness area, etc,) from this endeavor would be too extensive and damaging to to the entire, extended area . Please DO NOT allow this proposal to move forward !!!
