To Whom It May Concern,

As an American citizen, I am totally against the leasing of public lands and waters designated as National Parks, preserves, monuments, sacred land or any other titles setting them aside for the recreational use & enjoyment of the American people to any entities that would seek to alter & disturb the lands or waters in any way. No amount of money or wealth is worth destroying these God-given creations to which we are to be stewards not desecrators. These areas are reminders of our Creator's goodness & love for humankind. He gave us such beauty to marvel at the wonders He has created for us to enjoy as places of peace, quiet, and awe. We are not here to enrich ourselves with these lands and waters but preserve them for future generations, if there are any after the ongoing dismantling of protections and regulations.
