Title:

Comments: I am opposed to this idea in so many ways. Nevada has so much WIND Resource at our disposal. How is it that we need to keep giving away our STATE RESOURCES AWAY?? We already have hydro electric being taken from us and not being used FOR NEVADANS.

Can we please just stop the madness and be a State that LEADSS America into the future? The Ruby's are revered by many Naturists from all over the world! Would it not make more sense to have more Natural places to encourage tourism then just relying n Tahoe??
