Title:

Comments: I strongly support this project. This is our community setting the stage to build the next generation of world class athletes. It is a thoughtful use of the mountain to create a training venue higher up on the front side of the mountain. It will allow training through more of the year. It will also require dramatically less water to prepare it for the season than the existing low training area. And, it alleviates overcrowding of the existing facilities on Golden Peak. This is will create a resource for all the community that I would hope everyone can support.
