Comments: I respectfully urge your consideration to approve the Golden Peak expansion project. It's a critical next step in ensuring the safety for younger athletes who train on this facility. The rising popularity and international recognition of the Golden Peak training venue has led to over-crowding at times which is a safety concern for younger skiers.

This expansion will also enable many families to save on training costs and keep these funds in the community, particularly for late and early season training when the businesses and families need it most. Thanks for your consideration for this critically needed improvement. Best, Jason Napoli
