Comments: I fully support Golden Peak, Vail ski area expansion (Improvements 2016 #47937) as I see it bringing a much safer training environment for the athletes of the Valley. I also think that the improvement will benefit the visitors and tourists by modifying the high ski/snowboard traffic in the area. I don't think that the expansion will bring any harm to either homeowners of the valley nor to the wilderness as the expansion area is relatively small. The improvement could bring a variety of opportunities for more productive training and extended seasons for current and prospective athletes.
