Comments: Golden Peak expansion is not an easy decision but it is easier if we think about the future. Children are 28% of our population but 100% of our future and growth will happen planned or not. This is an opportunity to do the right thing for the next generations to come because both the Forest Service and people in the community have seen the valley grow and it is also great to have both parties being thoughtful in the process. This expansion will give us all an ability to stretch out and not over crowding the bottom of Gold Peak and should help the population on the hill from causing less unfortunate accidents.

We should try to find a balance between the creatures of nature as well as athletes. If it is done in a responsible manner it ought to be a win for all. I am grateful that this has been a process of thought and consideration and I wish the expansion happens.
