Title:

Comments: The risk/reward for issuing these leases is not worth it. Nevada has already had its water ways decimated by other commercial land uses such as mining. Why risk this gem of a mountain range for a little bit of oil/gas. The water, wildlife, and recreation are all worth more than any oil/gas that may come out of the ground. This area draws people from all the surrounding states and is in my opinion one of Nevada's finest assets.
