Comments: The Ruby Mountains is a natural gem to all who enjoy. I oppose any gas/oil leasing within the mountains. I feel there are other places to explore within the state and around the area that need to be explored and leased without touching the mountains. Nevada has few natural beauties and the Ruby Moutains is one of them. Many people use the mountains to hunt, fish, and hike. No one wants to do those things with oil rigs so close by. It completely ruins the atmosphere in addition to a decrease in outdoor activities in the region. Please look else where.
