Comments: Dear U.S. Forest Service Region 2:

I am writing in support of the Golden Peak Expansion project #47937. My daughter takes part in Ski Club Vail and has benefitted tremendously from the opportunity to develop the discipline, leadership skills and character inherent in ski racing. The surrounding communities have benefited from the influx of families who support local schools, businesses and create economic opportunity through our choice and desire to live in the Eagle County area and support the SSCV racing program. This expansion is in line with the current Vail Resort footprint and will be supported by the efforts of the club and Vail Resorts. I believe the addition of the training area will increase the opportunity for the Vail area to host regional and national ski racing and will further benefit the region economically while respecting the low impacts needed on our national forest lands. The project includes only a surface list and will be maintained with fee dollars returned to our national forest system.

Thank you sincerely for your consideration of these improvements.

Amy Roberts
