Comments: To whom it may concern,

I ask that you please do not allow oil and gas leasing/fracking in the beautiful Ruby Mountains in Nevada. It is one the most easily accessible ranges in Nevada, for recreation and tourism. I have taken visiting guests here, we love Lamoille Canyon, and have camped, hiked and fished. It is so sad and discouraging to think of places like this - all over the country - that are going to be considered for life-long damage. Please don't allow this. Thank you -

Barbara Lentz, Reno
