Title:

Comments: It is unclear to me why, after an overwhelmingly negative response to this proposal by over 7000 individuals, that the comment period has been reopened after closing in November of 2017. But I will reiterate my strong objection to this plan again. The ecological, economic, cultural, and recreational benefits of leaving this region undisturbed far outweigh any short term monetary gain from oil/gas leases. My family has lived in the region for generations and I join many in entreating the Forest Service to abandon this project.
