Title:

Comments: Oil and gas are no longer viable options for energy use and consumption in this rapidly changing world. We need to instead of using resources, money and man power on projects like this, to invest and embrace real sustainable and renewable energy options like solar, wind and water. I object and disapprove of any research or exploration of giving or renewing leases to exploit and/or obtain gas or oil from Nevada's earth or soil in any way whatsoever. Please do not do this. We need to protect the few natural wonders we have left, not continue to destroy them. Thank you.
