Title:

Comments: Dear Forest Service,

I support the No-Action alternative, i.e. Alternative 1. I am a backcountry skiing enthusiast, and would favor keeping this area preserved for non-motorized backcountry recreation.

If the ski area expansion is allowed, I support implementing the following measures to reduce the impact on backcountry recreation:

Prohibit any further commercial development of the Atoma Area north of the Mt Rose Highway.

Require public access to the Atoma Area by the non-paying public, including parking in the ski resort parking lot, access over the ski bridge, use of any restrooms on public land, and designated uphill and downhill routes through the Atoma Area resort area.

Require continued public access to any national forest land being used as a commercial ski area.

Sincerely,

Manuel Calderon de la Barca.
