Comments: Ruby Mountains are NOT for Oil and Gas

To whom it concerns:

Please do not allow any portion of the Ruby Mountains to be leased for oil and gas. These lands are precious and necessary and leasing them for corporate profit is a betrayal to the American people and all of the living beings on that land. No good will come of leasing this land; only harm and damage to Nevada's wildlife, water and pristine lands if fracking invades the Ruby Mountains. Please don't lease it. Please protect our wildlands.

Sincerely,

Margaret Patino
