Comments: Ruby Oil and Gas

re: As part of the analysis, the Forest Service will decide if all or a portion of these NFS lands are available or are not available for leasing.

I am responding AGAINST you deciding if all or a portion of these NFS lands should be available for leasing land for private use. Public lands are for enjoyment of all. Aren't you supposed to be concerned about the sage grouse decline also?
Why is leasing these very important for wildlife public lands even being considered for oil and gas?
