Last name: querner

Organization:

Title:

Comments: Ruby oil & gas

This area is on or near (map) the Ruby Wilderness area. Fracking, mining and drilling are devastating to the environment, disrupting forest/trees/feeding and breeding grounds and leaves behind poisoned water- this proposed lease to drill is a mistake and should not be allowed. We must protect wilderness, and in doing this protect land/water/ wildlife- NO to drilling here!

"To give anything less than your best is to sacrifice the gift"- Steve Prefontaine
