Comments: Ruby Mts Oil and Gas Leasing, Environmental Assessment

To The U.S. Forest Service:

I am against any and all Forest Service activity, including environmental assessments, that could lead to the leasing of our (the American people's) legacy of pristine habitats for any form of mineral extraction. Our national forest legacy belongs to the American people, not the Trump administration and not Big Oil.
Thank you very much for this opportunity to comment.

Sincerely,

Johnny Armstrong
