Comments: Ruby Mountains

USFS,

One of the best backpacking trips I ever took was in the Ruby Mountains. Why? Because of it's unspoiled nature. It's the only place I ever encountered wild sheep. It is an island of great beauty. Please do not ruin it by allowing oil and gas drilling there.

We desperately need wild places like the Rubies to maintain biodiversity and spiritual grounding.

Don't prop up the dying oil and gas industry in order to further destroy planet Earth.

Respectfully,

Thomas Gump
