Comments: Comment on Ruby Mountains in NV

Greetings members of the FS,

I am writing in to comment on the proposed changes to land use in the Ruby Mountains in NV.

I am in favor of keeping these lands protected for public use, and against opening them for fracking purposes.

These mountains have held a special place in my family's hearts. It was one of our first hikes that we took the children on, and we have incredibly fond memories of this beautiful place. It's a favorite backpacking destination of mine. I think it has far more value as a recreation and tourist destination.

I hope you take this into account as you consider this decision.

Thank you very much,

Renee A Davis
