Comments: Ruby Oil and Gas

Good morning,

I am writing to object to the Ruby Mountains Oil and Gas Availability Analysis Project. I oppose opening park lands to oil and gas industries. Instead of ruining our National Parks, why doesn't this administration take a look at the very real dead end we are approaching? Other countries are taking the lead when it comes to renewable energy and the U.S. will fall behind. Let's stop destroying our planet and embrace a clean, healthy future. Sec. Zinke needs to stop his attack on our public lands. Once these places are gone, they are gone for good.

On a separate note, one of the links in your public notice is not working. Please fix this as it could impact the ability of the public to comment on this project. I am referring to the link in paragraph 9 of the PDF letter found here: https://www.fs.usda.gov/nfs/11558/www/nepa/107601_FSPLT3_4285724.pdf

The link in that paragraph should redirect to: <https://www.fs.usda.gov/project/?project=52443>

However, it instead redirects to an "invalid project" at: <https://www.fs.usda.gov/project/?project=52443>.To

Please fix this error.

Thank you,

Janice Medina
