Title:

Comments: Gas and oil drilling

Drilling on public lands should not be allowed. National forests should be off limits for those activities, which I believe will pollute and spoil habitat, harm wildlife, and generally degrade forest. Besides, fossil fuels should be phased out, not increased.

The corporations that undertake drilling and mining have profit as their goal, nothing else, certainly not the welfare of the forest.

Wilderness should remain wild and unspoiled for future generations.

Thank you for reading this.

Sincere,

Janice L. Jones
