Comments: Ruby Oil and Gas

As an American citizen, I am opposed to this bad plan because:

1. Fossil fuel exploration in the area will damage or disrupt the wintering ground for the state's largest herd of mule deer and prime habitat for sage grouse and Nevada's official state fish, the rare Lahontan cutthroat trout.
2. The Nevada Department of Wildlife expressed "great concern" about the proposal.
3. The parcels in consideration for leasing encompass some of the richest fish and wildlife resources the State of Nevada has to offer.
4. The state's public lands shouldn't be sold off to the highest bidder.
