First name: Susan

Last name: Ryan

Organization:

Title:

Comments: Ruby Oil and Gas Company

To Whom It May Concern:

I vehemently oppose the move to open any oil or gas leases on public lands!

The human race is at a crossroads--either act as a good steward of the remaining wild places on this planet and preserve the biodiversity therein, or let greed and momentary profit sway us at the cost of a habitable planet for our children and grandchildren. There is no good-steward reason for permitting any oil or gas leases in our forests. No, there is only greed.

I counsel you against greed and I fervently urge you to act for the preservation of life in this forest, on this continent, and on this planet.

Susan Ryan
