Comments: Please do not allow oil and gas companies to despoil the purity of the beautiful and pristine Ruby Mountains. I am against the commercial exploitation by energy companies of our public lands. This National Forest provides habitat for unusual and beautiful wildlife, as well as recreation opportunities for Americans. We should be moving away from the use of fossil fuels. Let these companies put their resources into providing different sources of renewable energy. Do not permit them to ruin these lands, which have been kept in trust for Americans for so many years, and which should be a legacy to our children.
