First name: Joan

Last name: Granato

Organization:

Title:

Comments: I do not support oil and gas exploration in the Ruby Mountains. This is a place of peace and life for my family. We have created many memories here, backpacking and camping in the wilderness. If you start drilling here, it will ruin it forever. Please look into alternative fuel sources and stop our destructive reliance on non renewable energy. I fear for what environmental problems my son and his generation will have to deal with.
