Title:

Comments: Dear Sir or Madame,

I object to any leasing of the Ruby Mountains for oil, gas or other mineral extraction.

Please honor in full the comments against energy extraction leasing which you have already received! There appears to be very few in favor of fracking. I am NOT in favor of any fracking.

I believe we need to protect Nevada's "Swiss Alps" and the wildlife living in or traveling through this region. I believe for the long haul that protecting this environment is good for Nevadans, and for tourists from all over. Over the long haul, there may be fewer and fewer pristine areas to attract tourist dollars.

Please save the Rubies for wildlife habitat, and recreational uses for us now and future generations.

Please also consider the need to continue to maintain the Rubies' watershed in a healthy condition. This will support all wildlife as well as humans living downstream.

Thank you for your consideration of this request.

Respectfully submitted,

John Hervey
