Comments: To whoever this may concern,

The Rubies are a true beauty and have been a well kept secret in Elko County but recently the tourism has increased in the past couple of years. More and more people unfamiliar with this mountain range are traveling to visit this beautiful mountain range. This mountain range is home to Elko County and by allowing leases for drilling would put this environment at risk for contamination and pollution, and ruin the beauty of this mountain range.

The Rubies is the background and the get away spot for many residents in Elko County. There are many other places to lease land for drilling but the rubies are not option. Don't let the potential of an oil reserve that might not even exist,ruin a beautiful mountain range and ecosystem that took thousands of years to create and cannot be recreated.
