Comments: Hello,

I am adamantly opposed to the possible oil drilling of the Ruby Mountains. These mountains are a pristine masterpiece that draws in countless people from around the world. Don't give in to big dollar signs that could ruin these mountains and the wildlife for the foreseeable future. By going ahead with drilling of these mountains you risk the possibility of ever bringing back the struggling herds of bighorn sheep. You also ruin future generations ability to enjoy this great part of Nevada. Please don't allow this to happen.
