Title:

Comments: I have been in NV since 1987 and enjoy its beauty from being the hilliest state in the union, to the hot desert down south I, to the serenity of Lake Tahoe. People come from around the world to see Tahoe. Let's keep our land as unblemished as we can. Don't disturb the wildlife or spread the cheat grass with the treads of your construction vehicles. We didn't need middle silos all over our state and we don't need fricken fracking oil here either.
