Comments: I support reopening roads that have been closed. I support the creation of new roads for atv's and utv's. I do not understand how you restrict access to an area and still call it "public lands". If I can't access it then it isn't public. I'm 73 years old with bad knees. If I can't utv somewhere it is effectively closed to me. I am against width restrictions. There's plenty of land where the topography naturally restricts vehicle access.

I do agree that some areas are so pristine that mineral extraction should be restricted.

Dispersed camping should be encouraged.

I absolutely agree that wilderness is a land of no uses except for those who still have the ability to walk great distances. Public lands should be accessible for all of us.
