Comments: Ruby Oil and Gas

To Whom It May Concern,

The proposed plan to open the Ruby Mountain range to oil and gas leases is categorically detrimental to the surrounding ecosystems, including flora and fauna as well as the local community, and should be stopped. I implore you, or any governing body in power, to extinguish any advancement of BLM, or industry, designed to extract any amount of natural resources from the Ruby Mountain range.

Please inform me if there are any opportunities or actions available to protest this plan.

Thanks in advance,

Mark Mattos
