Comments: against Ruby Mountain development

I grew up hiking, hunting, fishing, and enjoying the beauty of the Ruby Mountains. Nevada is unique in it's large amount of BLM land, but that doesn't mean it should change. The Ruby mountains should be protected and preserved for future generations to enjoy, and I strongly oppose any and all development there.

Do not permit this development to continue. Even if extensive mitigation is promised, it will invariably threaten the habitats of the many animals who call the Ruby Mountains their home. If we don't draw a line somewhere, we will lose all of Nevada's natural beauty and become the property of various money-hungry businesses.

Thank you for considering my comment,

Chloe Lomprey
