Comments: 1: What is the plan when the parking lot fills up? Are there going to be no parking signs along the road all the way to the highway? Into Trailbridge CG?

2: Going along with the first question, are there any improvements or considerations being made for Carmen Reservoir? Sahalie or Koosah Falls? I can see those being the overflow parking areas just because they are next closest on the map. As it is right now there is no extra room at Sahalie and Koosah and the fisherman and day use folks at Carmen are already getting choked out. This could make the problem worse.

3: Is this going to be a fee site? If so are you going to make Koosah, Carmen, and Sahalie fee sites? If so how are you going to regulate that?

4: Now that there is going to be a designated parking area for Tamolitch, this is going to encourage more people to go there. Are there any efforts being made to limit where the people can go or walk/swim once they get to Tamolitch Falls? The place is getting trampled and people are getting hurt every month. Can there be an effort to help preserve this place instead of just creating parking for more people to come in and trample it?
