Comments: Hi Forest Service,

I would like to weigh in on the dispersed camping around Tincup. My family and I have been going to Tincup for years (we have a cabin in town) and over the last year it has been such a pleasure not having dispersed campers. There has been significantly less traffic, trash, and creation of new fire rings. With the Cottonwood pavement project coming to a close there will be more traffic coming through Taylor Park and I think it is very important that the dispersed camping ban becoming a permanent thing. More traffic could mean more campers, trash, and fire rings, which is something I do not like seeing in Taylor Park and Tincup.

I hope that you consider making the dispersed camping restriction permanent so that Tincup and Taylor Park can continue to remain gorgeous and pristine.

Thank you,

Carey Willette
