Comments: I feel there should be more areas opened to motorized trails. There are some routes that have been closed in the past and I feel they should be re-opened. Mentioning the Palisade Plunge project, I feel long distance motorized routes should be created as is being done with non-motorized routes. There are no new motorized routes being allowed, yet non-motorized routes are opening up all around the forest. There needs to be more dispersed camp areas created and allowed. Please do not close dispersed current dispersed camping areas without opening new ones to take their place. User groups could be used to help keep the dispersed sites open. I strongly feel new wilderness areas should only be created in places where new routes or mineral extraction is not possible.
