Comments: Dear USFS and those involved in "Golden Peak Improvements Project Draft EIS" improvement analysis.

I'm against the development of additional FIS and Ski School development methods on Golden Peak. Both the hill, and the school are providing adequately (right now) for the needs for FIS champions. The school employees a lot of locals, and floaters, the economic impact is significant already. I need not grow to be of a continued success. There is currently a HEAVY impact to both the history, lift operations, customer experience and lift line congestion at Golden Peak #6 lift. Additional exposure, and development will markedly degrade the history and operation quality of users at Golden Peak.

The hill, the history, this person that bought in first/early do NOT need additional resources to negatively congest an already congested hillside in the morning, lunchtime and closing.

The most kindest regards.
