Comments: Golden Peak Improvements 2016 #47937:

I am in full support of the improvements on Golden Peak. I feel that the benefits far outweigh any impacts or downsides associated with the project. The additional ski runs will allow our budding skiers racers and visiting world class ski racers, to be separate from the skiing public increasing safety and reducing congestion on the current ski runs.

These additional runs at the top of Golden Peak will also allow for training during the time that the Burton Snowboard event closes current training areas.

The relatively short surface lift to be installed with the implementation of this project will GREATLY enhance the quality of training for all athletes using the facility.

Safety to both the ski racers and the skiing public will be enhanced as the separation will now be largely geographic. The racers will no longer be required to transit to and from other dedicated training areas located across the ski area.

I thank you for your consideration of the implementation of this project.

Craig L. Roberts
