Comments: I strongly urge you to reject Vail Resorts' proposal to change McCoy Park.

This proposal to change McCoy's into a family ski zone is so disappointing for multiple reasons. The snowshoe park and nordic center is a huge asset to Beaver Creek, and is unlike anything at other Vail Resorts properties. It is a great place for hiking when the skiing conditions are unfavorable, and an interesting way to access more of nature that has not been developed by equipment (and thus has scared off the wildlife). The area is quiet and serene, and new equipment, traffic and ski access will forever change the area. There are other areas of the mountain that could be developed for a similar purpose, and I would highly encourage Vail Resorts to reconsider. We look forward to days in McCoy's - and know that many of Vail Resorts' consumers do as well. This change would rob us of that privilege and impact nature, wildlife and the forest for years to come. I am very much against this proposal and am happy to be reached for further commentary.
