Comments: In general it appears that Vail Resorts gets WHATEVER they WANT in Eagle County. Year after year the USDA asks for input and year after year Vail Resorts gets exactly what it wants. Long story short. Climate change has impacted the ski season yet Vail Resorts continues to expand. year after year Vail Resorts takes advantage of the federal government and ultimately the taxpayers. The Forest service doesn't even have enough resources to keep Yeoman campground open and the USDA continues to outsource. Here's an idea, quadruple the cost of the yearly lease for every ski resort that operates on federal land and use the additional revenue to manage America's resources, if the USDA cant do that then sell the land to the highest bidder and let's have a free for all the Vail Resorts gets anyway.
