Comments: To Whom It May Concern:

I am a Denver resident with a second home in Beaver Creek and am thoroughly opposed to the Beaver Creek Resort - McCoy Park Terrain Development. Although my family members are downhill skiers, I am not. I snowshoe, hike and cross-country ski. One of the reasons we purchased a second home in Beaver Creek is because of McCoy Park, where I can go to cross-country ski and snowshoe without being disturbed by downhill skiers and mechanical chairlifts. As the only high alpine dedicated cross-country ski and snowshoe park in the country, it is a unique asset in the Vail Valley that needs to be preserved. Vail Resorts' proposal will reduce the amount of terrain available for these activities by roughly 40%, will confine them to the edges of the current park, and most importantly, completely destroy the pristine nature of the park by putting two chair lifts right through the middle of it! There is ample downhill skiing elsewhere at the resort and in Colorado. Please don't let them destroy this unique space! Thank you.

Sincerely,

Melissa McCalla
