Comments: The proposed mogul course will be a huge boon to our training during the season, allowing us to train on a purpose built run, the location of which will prevent the public from poaching the course, thereby increasing their safety. We can not prevent people from using our jumps when we aren't there and it's a significant liability to those people cutting the ropes to hit them on Cookshack. Additionally, we won't e constantly lapping lift 2 anymore, which will alleviate some of the traffic there, making the list line smoother.
