Title:

Comments: I would like to voice my strong support in favor of the proposed expansion on Golden Peak. With children in the competitive ski program and myself an avid member of the skiing public, I can see the definite benefit. The project will reduce traffic and congestion, proving a safer environment for ski racers and the general public.

Additionally, this project will provide greater visibility to this ski racing venue around the world, as it will bring high level athletes to train on the new space, especially during the lead up to the Bird of Prey race.

Please approve this expansion. Thank you.
