Comments: I am writing in support of the Pandora Lift and expanded snowmaking ability on Aspen Mountain. I have read the proposal and strongly believe the proposal to build a new lift, create new trails and improve accessibility to terrain during the early season through expanded snowmaking infrastructure should be put into place. Warmer falls seem to be pushing back the start of ski season each year, resulting in less skiable acreage available to ski between Thanksgiving and Christmas. The result is lower confidence amongst tourists visiting the region, with lower retail sales and occupancy in lodges. These proposed improvements will provide a significant beneficial economic impact to the City of Aspen and surrounding communities through excitement over new terrain and greater confidence amongst tourist to visit earlier in the ski season. More terrain and snow making at higher elevations insures a greater product to all citizens and foreign nationals who choose to spend money in our community.
