Comments: GMUG Forest Plan Revision - Scoping Comments

Dear GMUG Forest Planning Team:

I moved to Colorado 12 years ago to enjoy the unparalleled natural beauty this State offers. I'm an avid hiker and camper and I subscribe to the "leave no trace" mindset in pursuing any outdoor activities in Colorado's wilderness areas.

Recreation is a key social and economic driver on the GMUG National Forest and I would like to see recreation addressed pro-actively through the Forest Planning process. Through Wilderness and special area designations, the Forest can protect and enhance recreation experiences for users and ensure these landscapes remain intact for future generations.

Responsible recreation while supporting the rights of landowners, mineral rights holders, and, most importantly, wildlife is paramount on my mind when it comes to GMUG Forest Planning. This area is amongst the most rugged, scenic and unspoiled lands in our State and I'm sure you will make responsible decisions to ensure it stays that way for generations to come. Thank you.

Sincerely,

Daniel Cummings
