Title:

Comments: i totally and unequivocally support maintaining primitive lands in the united states. humans need to get into areas that are accessible yet silent to renew our sense of well being. in this increasingly hectic world, our society requires areas that can be hiked. the Forest Service is in concert with this purpose. for that reason i ask you to wilderness area for Granite Basin as it now stands: wild and beautiful. the animals living there will thank you and so will i!

most sincerely,

maggie dijkstra
