Comments: Grand Mesa National forest proposal of 214,700 acres

We have lived in the beautiful Colorado all of our lives and enjoy the outdoors doing archery, camping, fishing, hunting, snowmobiling and 4 wheeling, this is what Colorado is all about- the great outdoors for ALL to enjoy what they like to do.

Unfortunately the government seems to enjoy taking our land from us as much as we enjoy it! Over the years it has been one trail after another closed off no longer to access for some reason or another, if this is kept up in the very near future we'll have absolutely NO access to anything. All outdoor activities and sports will one by one end for each one of us.

We stand up against any silly proposal to take away any more of our land.

I believe there is enough mountain for each of us to continue to do what we love to do, respecting our land and grateful that we have the freedom to use it.
