Comments: The western slope is based on outdoor recreation. Keeping areas open to recreational use is very important! Pushing people away will simply take the local and tourist money elsewhere where people can enjoy themselves. Cattle are also very important to have graze. Not only do people make their livelihood off cattle, but cattle helps to keep vegetation controlled. Please reconsider closing off the use of these public lands, to atv riders, campers, hunters, cattle... keep western slope a big hub for outdoor recreation.
