Comments: I wholeheartedly support the Granite Basin becoming a wilderness area.

I have lived in Crested Butte South for over 21 years and have seen many changes but none as dramatic as the population growth over the last 5-6 years. I believe having a wilderness area will bring some balance back to the community to be able to have some quiet areas of recreation and peace.

As a homeowner and living in such proximity to the National Forest, I recreate on our public lands on a daily basis. Having a designated wilderness area will allow the non-mechanized user more freedom and areas to explore.
